#### What was good about the course?

- Provides clear explanations.
- Explains of questions are clear and lucid.
- Clearly illustrates every step of the questions.
- TA is very positive and always encourages us to be interactive. This promotes us to think the tutorial questions and try to solve them. It really helps us build the knowledge framework so that we can understand this course better. Besides, he can answer most of the questions and doubts in the tutorial, which is very helpful. The handwriting on the board is very clear and well-organized.
- It gives me an opportunity to have a better understand of the problem I need to solve.
- The explanations are really clear and helpful.
- 

#### What could be improved?

- Add more revision material.
- TA has done very well in this tutorial. If I have to say something, maybe he could provide more description of the link between the knowledge we learned from the lectures and the tutorial questions.
- More training required for delivering sessions.
- The tutorial time is too short for some tutorial questions.
- Proper explanation instead of saying you should already know this.
